

Traits General Report

NAME	RESULT
Ability to eliminate harmful substances	Slightly reduced
Adipose tissue formation	Normal
Aggressive Prostate Cancer	Increased risk
Alcohol Addiction	Read Technical Report
Alcohol Flush Reaction	Do not show reaction
Antioxidant capacity	Normal
Biological Ageing	Read Technical Report
Birth Weight	Read Technical Report
Bitter Taste Perception	You may perceive the bitter taste
Blood Glucose	93 mg/dl (average)
Blood Glucose In Obese Children	Increased insulin resistance
Breast Feeding And Intelligence Coefficient	IQ increase
Caffeine And Anxiety	Normal levels
Caffeine Consumption	Increased consume
Childhood Obesity Measurements	Read Technical Report
Diet Response	Read Technical Report
Drug Abuse	Typical risk
Duffy Antigen (Malaria Resistant)	Probably no resistant
Error Avoidance Capacity	Less capacity
Exercise-induced muscle damage (initial phase)	Normal risk

Traits General Report

NAME	RESULT
Exercise-induced muscle damage (regeneration capacity)	Better regenerative capacity
Exercise-induced muscle damage (second phase)	Protective effect
Eye Color	Read Technical Report
Freckles	Read Technical Report
Gambling behaviour	Typical
Glucose Tolerance Response With Exercise	Typical
HDL Cholesterol Levels	Normal
Hair Color: Blond Hair	Read Technical Report
Hair Color: Red Hair	Read Technical Report
Hair Texture	Read Technical Report
Heroin Addiction	Increased risk
Intelligence Measurements	IQ increase
LDL Cholesterol Levels	Slightly less
Lactose Intolerance	Probably intolerant
Longevity	Read Technical Report
Malaria Complications	Slight protection
Male baldness	Increased risk
Memory	Read Technical Report
Muscle Endurance	Probably sprinter
Nicotine Addiction	Read Technical Report

Traits General Report

NAME	RESULT
Nicotine Dependence And Adolescence	Less risk
Norovirus resistance	Susceptible
Obesity Measurements	Read Technical Report
PSA (Prostate-specific Antigen) Levels	Normal
Pain Sensitivity	Typical
Persistence Of Fetal Hemoglobin	No persistent
Photic Sneeze Reflex	Typical
Pigmented Rings On The Iris	More pronounced
Preference For Sweets	Increased
Preterm birth	Increased odds
QT Intervals	More prolonged
Response To Exercise	Read Technical Report
Sex hormone regulation	Read Technical Report
Smell, The Sense Of (Olfaction)	Read Technical Report
Stature	Read Technical Report
Tendinopathies in lower extremities (legs)	Probable risk
Tendinopathies in upper extremities (arms)	Normal risk
Vitamin D levels	Less
